

Bernadette Call 8.21.2020

Tragedy and Comedy are on the same continuum in its own type of an alpha omega construct. From the zero point if you go up one side of the circle to its ultimate point of, say, tragedy it is really simple to be pulled over to the opposite side of comic relief. There is no doubt that what appears to be playing out as reality is a tragedy until you realize that it is a movie we are watching unfold and that it is really a Divine Comedy that is unfolding; and, the joke is on the deep state cabal.

Italy was the first country to be aggressively shut down. Why? We had to take out the head of the octopus. Northern part of Italy is where the black nobility lives. Also, in play is the Vatican and the mafia in Sicily. A key top tier are the Phoenicians/Venetians who have been identified as the 13-bloodline coming down from the Canaanites who are cannibalistic (Baal worship, child/human sacrifice) and part of the black nobility banksters that are behind the current Babylonian financial enslavement system that is being dismantled. These bloodlines may also have interbred with Nephilim, and other alien entities, which are not of this world; and, perhaps need to be deemed "illegal aliens" that have no authority to be on Gaia.

These bloodlines are concentrated in Venice, which is an island sea vessel, which has been instrumental in imposing admiralty/maritime law. Apparently, this city is where the birth certificates are being stored. Admiralty law is the law of the sea, which is based on lawlessness and pertains only to protecting cargo as an asset. Admiralty law protected crown assets; while, maritime law protected the cargo of merchant ships. Neither construct is the law of the land and the sovereign rights of the individual. What is being restored in Constitutional Law and Common Law, or common-sense law where if there is no victim or damages there is no case.

The Constitutional Republic is being restored as evidence by many of the hidden clues that Trump and this administration is putting forth including Prison Reform, elimination of tax on labor, and appointing Constitution judges. During the Obama administration we saw Sheriff Mack and Rhodes educate sheriffs around the country (Oath Keepers that take the oath to defend the Constitution for life) on their Constitutional authority as being the highest law enforcement of the Land. As such, with the defund the police movement, and general disarray amongst law enforcement in many democrat run cities and states, it may end up that law enforcement falls under the jurisdiction of the sheriffs who are elected officials unlike the Chief of Police.

During this time of the Obama administration, in every state, there was an education and movement to create de jure Grand Juries and educate them on Constitutional Law. De facto grand juries is what is in play under Admiralty Law and USA inc. construct which has no real authority under the Republic. Today, there are nearly 183K sealed indictments. That number is only possible if the de jure grand juries are being used on

behalf of the people, as opposed to prosecutors convening grand juries. Over 21K indictments have been unsealed. We will see, a la Q, if it is going to be a “hot” summer.

Trump talks to many different players simultaneously at pressers (e.g. unwoke, Deep State, QAnons, military) so you have to decipher his codes. For example, MS-13 is not just vicious gangs but also 13 equal M... He is also referring to MSM. Trump often puts his right hand over his left palm, which could signal as above so below from the right, or righteous path, that is now in play. He is tugging his right lapel may be the same meaning of pulling from the right or righteous. Plus, he touches his right eye as well.

Trump is increasing the use of Treason in regard to Obama, Biden, Strzok, Page, Brennan, and company. Judicial Watch is frustrated that these players, along with Clinton, appear to be shielded from turning over evidence. More than likely these cases are a distraction, and they are being handled by military tribunal for the heinous crime of Treason and crimes against humanity.

Q has a multi-faceted meaning. It is the 17th letter of the alphabet. Ian Rand published “Atlas Shrugged” in 1957 or 4 years before JFK took office. Some say that the Kennedy family and Trump funded making it into a movie. Interesting coincidence, or not, who is John Galt is key phrase throughout the first 2 parts. Today, we ask who is Q. John Galt initials are JG – J = 10 and G =7 added together they equal 17. Even JFK’s birthday has 2 17s. 5.29.1917. If we take out the 17 in the year, it leaves 19 which added together is 10 or 1 which is extra. His month and day equal 16. However, if you add the spare one from the year you now have 17 or 17 17.

Lincoln was the last president of the Republic and number 16. As the Republic is being restored Trump and more than likely John John as VP would make them the 17th President and VP of the Republic. When will John John appear on the scene? More than likely when things add up to 17 and before November 3rd. The question is whether 2020 which equals 4 will be part of making a 17. August is out of the question math wise. I am thinking October to put it in right before the election.

Trump talks about the economy and market making a V curve .. super V .. V is for Victory, or even perhaps Vendetta. AG Barr is mentioned many time using AG instead of Bill. What is AG? Silver in the periodic table. Are we backed by silver bars in the financial system? Peace agreement with Israel and UAE in oval office has gold and silver curtains behind Trump and Mnuchin was there. Yet another clue to a financial reset and asset backed USN. In addition, it is worth paying attention when Trump uses the periodic table number for Gold, silver, and other precious metals.

5G apparently has been tuned to 432Hz, which is calming and healing. COVF EFE. Appears to have 2 meanings. 1) Cobalt, Vanadium, and 2 Iron which would be potentially the composition of magnetic metal for tesla towers. 2) Cov references the virus. Apparently, if a person has taken adrenochrome they have an issue with iron and if exposed to HCQ would kill them. Some are talking about chemtrails may have been laced with HCQ. HCQ also decalcifies the body. With all of the crap in food,

environment, fluoridated water, it calcifies the pineal gland. If HCQ is introduced perhaps it is the ingredient for the great awakening which clears out the pineal gland making it possible to perceive expanded constructs available through the 5th dimension and above. It is worth considering that HCQ is the vaccine given that it is a preventative. Plus, Trump is constantly talking about therapeutics. Are we finally going to see the release of cures and “vaccines” that reverse the damages done by the cabal against our health and the health of all sentient life on Gaia?

Trump recently was asked about QAnon as a conspiracy and whether he is saving the world from satanism, cannibalists and child trafficking. He said if he was saving the world, “wouldn’t that be a good thing”? Clearly, this is being addressed on a worldwide basis. Lebanon is a good clue. There is a massive tunnel system under the silo. Lebanon appears to be a big trafficking hub with underground infrastructure.

New Zealand and Australia are again in a total shut down. They found an underground network that was below the one they cleaned out. We are taking out their distribution system. It appears Common Wealth countries are at the heart of trafficking and child sacrifice and they are in the process of being liberated; along with European black nobility-controlled countries and by extension their colonies. In addition, these countries and others are going for mandatory vaccination. This push is designed to wake up the population to do their own regime change and usher in a republic form of government that goes for sovereignty and prosperity for all citizens. Once this push goes into force, the diaspora will more than likely return back to their native countries.

Charles Ward, Charles Freak and Cirstin W are putting forth very interesting intel that is decoding key elements as well. Comey, Page, Strzok, and Brennan were arrested in April. Comey and Page may have been released and wearing ankle bracelets. What we are seeing is a scripted movie unfolding. Q said, “what makes a good movie”. It is a good story and good actors. We are seeing some very interesting things coming across our TV. The players sound like the original but no longer look the same. Biden doesn’t look like the Biden of Obama era. Hillary doesn’t look like HRC. You can add to the list of different looking than what we remember: Kamala Harris (Charlie Freak says he has documentation and evidence the Kamala is a man born as Kamal – in addition, it is not eligible to be VP which is a higher standard than either House. Kamala is there to now put into question Obama’s own eligibility), Hillary, Bill, Nadler, Schiff, Pelosi, Charlie Hurt, Booker, Hunter Biden at DNC, etc. These actors could be doubles, bad clones (made in China), holograms, CGI, etc. In any case, the script is being written by the white hats. Trump and the white hats are in total control worldwide.

In the news this week is that the Iraqi PM met with Pompeo and was at the White House. The key discussion was regarding economics and their currency against the dollar. Trump said the dollar was strongest currency in the world. This is a clue that the treasury is overflowing most likely due to freeze and seize of assets worldwide based on cabal theft, trafficking revenues, human rights violations, and/or corruption. In addition, Trump stated that there are likely to be F35 sales to Middle Eastern countries. He

mentioned several times that the planes are invisible and that pilots will be better than Tom Cruise. His mentioning Cruise could mean something in relationship to Hollywood players and pedophilia, trafficking, and satanic ritual. We shall see. In any case Trump said we invented tech like the F35 and create new things that obsolete it. We will more than likely see the new tech from Space Force. In any case the F35 has its issues weighing in with 25m lines of code making it un-wielding to support and test.

Trump is ushering in world peace, which is a necessary component to implementing GESARA, which more than likely will be over time as people around the world are going for a regime change and implementing a Republic form of government. Peace throughout the world is definitely on the table. Brexit is being deemed a British Royal exit which is evident in that Buckingham Palace is boarded up from the inside; and, the Queen is on indefinite quarantine. More than likely she is being kept in that state in order to be part of an international tribunal that puts forward the crowns crimes against humanity in order for the British public, along with Common Wealth countries, to take control of their own sovereignty and form new Republic forms of government in order for everyone to prosper. Perhaps, the recent activities in Australian and New Zealand are a precursor to dramatic governance changes. What is interesting is that Boris Johnson post his contracting the “virus” appears to be a different person. Maybe he was a deep state puppet that is now under the control of Trump and the alliance.

Xi appears to be purging his intel apparatus and “deep state” players. China will shortly be operating as a Republic, which was announced by Steve Bannon in NY harbor. This action to liberate China from the communist party, and its oligarchs, may be why he was deemed a threat and arrested on dubious charges in SDNY.

Continuing with China is the 3 Gorges Dam which is developing cracks. It dams up the biggest river in the world the Yangtze. The water level is at an all time high and above the limit of what the dam can handle in terms of pressure. Plus, it has been raining making the ground saturated. Due to the rains the water level was rising at 10cm/hour. The dam is the biggest dam in the world spanning 2 miles. The only way to alleviate the pressure is to run water through the turbines or spill way. Neither can eliminate the water at a rate needed to dramatically reduce the pressure.

This dam is the largest in the world and spans 2 miles which is mammoth when compared to Hoover Dam. A dam of this size is to generate an enormous amount of electricity. What are these high demand entities? More than likely manufacturing is a player. However, a huge amount of energy is to power massive computer server farm complexes; and, most importantly to cool them. That is why Amazon, Microsoft, Google, and others are located next to rivers and respective dams in order to have a dedicated power plant for their facilities. We don't have massive rivers. As such, these Silicon Valley players are limited in the size of their complexes, which tend to be buildings the size of football fields with rows and rows of floor to ceiling bunkbed computers. In addition, should they be able to dramatically increase the size of server campuses it would be noticed and questioned as to their purpose of consolidating massive amount

of personal data. As such, it appears to be easier to transplant the tech infrastructure to China and massively expand its footprint without scrutiny or privacy restrictions.

The documentary "Shadowgate", which is worth hunting down (still available on DLive and on some YouTube channels that took a copy and reposted it), shows how the NSA was compromised where all the data they are collecting is being syphoned off to other entities (one run by Brennan) and analyzed by contractors with the intent to manipulate, and influence people, through the use of social media and other constructs by using private information including conversations, texts, emails, etc. Clearly, the Silicon Valley players are at the heart of this. As such, their computer complexes would benefit if they drew power for the 3 Gorges Dam power plant and had the ability to violate privacy laws of the US with impunity. Their power is derived by ingesting as much centralized personal data from worldwide sources with complicit government officials and oligarchs.

It is interesting to note that the Yangtze River is one of the largest in the world that has been now been "dammed" up. The Yangtze River Basin is the size of two Texas which is also all low lying. When that dam breaks it will take out, with a wall of water, everything down stream and in the basin, which would include Wuhan and potentially all the way to Shanghai. That event will wipe out significant manufacturing capabilities and more importantly all of the massive data centers of Silicon Valley players and their partnership with the CHINA, or the Clowns in America.

We are in a financial reset which requires a pause in global finance infrastructure. This pause was the reason for the smoke screen of the pandemic.

Part of the reset is NESARA/GESARA National/Global Economic Security and Reformation Act. Renamed with a slight of hand for obfuscation purposes. It passed in Congress 2000 and Clinton was force by military to sign into law the same year. It was to be formally announced 911 at 10am but clearly was derailed by the Bushes who did not want to see a shift in financial power. The Republic was hijacked post-Civil War with the advent of US corporation. The Republic is like the Phoenix rising out of the ashes into a rebirth. Perhaps, this will be the first time the Republic is in play as it was commandeered early on by the Crown and ultimately European banking families.

As part of ushering in NESARA, is a total financial reset into a new paradigm. We are seeing a RV of world currencies that are also being asset backed and made into sound money. All of our current economic models are invalid with this new construct. The old economic system is predicted on limitations and debt, both in economic constructs and fiat currencies. It is impossible to payoff and reconcile debt. Debt can't be paid off with debt. NESARA is being tested and implemented in stages by Trump. There are people who have had their mortgages and other loans zeroed out. Plus, Trump is talking about deferring student loan payments to next year and making payroll, income, and capital gains tax elimination permanent. Trump is making good on the famers claims that created NESARA by paying the farmers \$28bn out of "tariffs" from China. In addition, he is igiving money to native tribes, the most recent in Arizona. Social Security and

Medicare will now be funded by the General Fund. In addition, we will be looking at a flat tax on all new items that are non-essential. It is worth noting that the US Treasury, and by extension Ft. Knox, is overflowing with assets. All of this is part of NESARA.

The banking technology infrastructure has been controlled by the banksters. It is archaic. At its core is SWIFT which is a communication protocol with embedded action verbs that instructed banks on how to move money, along with, when and how to apply the transaction as debit and credits against accounts. This system has been gamed by these players in order to play with money over a period of time, in order to make more money out of thin air, through overnight lending. This pause before the transaction is actually applied is why it can take days and weeks before transactions that move money across banks is actually achieved.

The QFS was tested August 2. Every major bank successfully was pinged and responded. The QFS is a one-way transaction. It is our accounts that will be used to move money organically into circulation based on worldwide initiatives. You will have an account tied to your soul signature, along with a capability (more than likely a hardware device that only you can use) in order to move funds into existing accounts in order to cover operational costs of initiatives.

In order to test a new financial system, bring it into production, and reset the value of currencies required a pause on a worldwide basis. The pandemic facilitates that pause. In addition, it made it possible to take out the financial power elite such that a new system could be made operational such that “the meek” could inherit the earth. Part of the financial clean-up operation was: shutting down trafficking; rescuing women and children; seizing off-book massive assets; taking out distribution including ports and underground facilities and high-speed rail; closing money laundering facilities (more than likely everything that remains shut); and associated bank facilities (a lot of branches are being closed). Every time we see new areas being shut down, it is more than likely a cleanup operation by the white hats.

QFS uses block chain technology which tags transactions in a way that makes it impossible to alter. This is coupled with quantum physics that adds further protections against any modification with a quantum signature that is also tied to a unique event in time. The USPS filed a patent in 2019, which was granted, February or this year. The patent is to use blockchain technology, quantum computing, for a new secure voting system that will be in play November.

We are in the age of restoration. Trump appointed a new Post Master General. That position was held by the British Crown which is how the Crown retained control of the Republic of the US as a fledgling new nation.

We can see interesting transitions on the financial front. The stock market is in a dramatic up-tick. Who is buying? FedRez is buying corporate debt. Perhaps, key publicly traded companies controlled by cabal globalist oligarchs will be an asset of the

people. Microsoft is buying Chinese company TikTok. Trump said big chunks are going into Treasury.

The FedRez is under the Treasury and no longer has control. As such, we more than likely see the Treasury Direct Accounts going into play. The value in these accounts is predicated on perpetrating fraud by the financial elite using your name and SSN in order to make investments. Under the Lanham act ywe are entitled to all revenues gained based on the fraud and an automatic triple damage.

Let's look at what is in play that shifts financial power to the meek. It is the ZIM, which is not a currency, it is a bond. A bond is a covenant. It is God's financial instrument given its value is based on faith. Interestingly, on the Great American Coin Company no high denomination ZIMs are available; only, really low denominations like 1,000, which could be an indication that it is going into play for redemption. Who is likely going to be the purchaser is the US Treasury. The ZIM is what the QFS is for. In your hands, regardless of denomination it is pure unlimited potential. Think of it as an unlimited reservoir of funds to flow to where it is needed without any thought of it ever running out.

Something new is definitely in play. 5D and above is a new construct. We are able to now envision entire alpha omega constructs. We are dealing for the first-time economic prosperity that is based on unlimited potential on all fronts. We have built our lives based on lies and fiction. Our kids are taught junk math. We deal with junk science where people are paid to have the data support a false conclusion. Our financial systems are pure fiction. History is fiction and constantly being rewritten. Media is massive mind control propaganda. Entertainment normalizes heinous behavior. I would say "Dorothy we aren't in Kansas anymore." What happens to 4D timelines that are all based on lies? Do they cease to exist; and, does everything that is based on the foundation of these lies, collapse and go into a free fall like the demolition of the Twin Towers?

Something to consider is the adage of "if a tree falls in in the forest and no one is there to hear it, did it make a sound"? Something now to consider, in bringing into manifestation our vision of the future, does it require articulating it to someone other than yourself. If you say it to only yourself, and yet it has a butterfly effect, will it be made manifest? And, how quickly? The new 5D construct is based on equitable exchanges of energy.

What is also interesting to observe with the chaos and violence that is gripping big cities, is that people who have the wherewithal are moving out to suburbs, the country, and even rural areas. This trend is counter to the UN Agenda 21 where everything is being forced to consolidate into cities. What are the possibilities of re-inventing and stimulating the economy of small communities?

The old Babylonian enslavement structure dates back into thousands of years BC. What happens if unlimited energy is free? What happens when local agriculture sources become unlimited in abundance and nutrition? What happens when education based on

Knowledge transfer is unlimited and free? What happens when there is no need for money? How will the society evolve? How will we construct relationships, and transactions, that are equitable exchanges of energy? How does Renaissance 2.0 unfold? And, what is its impact in making things that are priceless again?
