

## **Bernadette Call 9.4.2020 – Presented Content from Call**

Let's talk about where we are, where we are going and what is possible. People around the world are participating in the Great Awakening to the Truth. We are in the 3<sup>rd</sup> World War. It's an information war. It's the great spell breaker. Trump is leading the charge with "Fake News" narrative. We are the spiritual Truth dissemination warriors. We have picked up the mantle, and sword, of Truth to Power.

We have been living in holographic illusion anchored on lies and deception. Which is a 3D construct. This great awakening is because of what these deep state globalists have done, and are doing, to our children. The unforgivable actions of this elite class that has ruled the planet include pedophilia, child trafficking, organ trafficking, child sacrifice, terrorizing and torturing children for mind control and harvesting adrenochrome, vaccinating children without consent with toxic components just to name a few of crimes against humanity. It is the big wake-up call. We tend to ignore the other crimes because we have been conditioned by entertainment, the media, corrupt courts that the bad guys get away with it and are rewarded. Saving the children is another story, where now the spiritual warriors are weighing in with our voice. This week there were over 100 children that were rescued. Massive amounts of children were found dead. When the brought the children above ground to field hospitals they died. So what happened was technology had to be brought underground. When Trump talks about building ventilators he talking tesla towers to generate electricity and medbeds for these children first to heal them and erase the trauma from their consciousness. Hence the Trump comment of everyone that needed a ventilator got one. Medbed are a futuristic Star Trek type technology that restores perfection/coherence at the photon level. What do we get from the media? Crickets. Why? They are complicit.

There are a lot of tentacles to this Babylonian octopus. What you see on TV is a grand scripted movie. What Trump and Press Secretary Kayleigh McEnany are coded messages of what is going on. Trump, and the White Hats, are doing a lot behind the scenes and in the "Art of War" you never disclose anything until it is a done deal. The dems on the other hand are pre-announcing that they intent to steal election through mail in vote fraud. This is theater to wake people up. We may be voting on-line tied to the QFS technology. USPS filed a voting patent using blockchain. It is also possible that at the core of voting is the technology of the QFS which can't be hacked. Charlie Ward is also stating we may be voting on-line. Perhaps, the census db, DMV, voter registration and other databases may be used in concert to ID the voter along with eligibility and locking down transactions to a single vote using blockchain technology and distributed ledgers or talleys.

The rioters may be taking out their own but making it appear to be a Trump supporter. They are acting like an organized death squad and they are being funded. It is interesting to see how quickly things are restored to calm when the Federal resources are deployed. Trump is waking up people to the dictatorial criminality of governors and mayors. Bill Barr, with Wolf Blitzer on CNN, stated that these rioters are transported

around the country, and are from out of state. This makes it a Federal law enforcement issue. In Oregon US Marshals are deputizing State Troopers as Marshals allowing them to bypass corrupt prosecutors. Trump said we could have Federal Forces in Portland in an hour and have the violence stopped in an hour. Antifa and BLM are operating like death squads that are organized and operate in a trained manner. What is being taken down in the organizers.

A video on Twitter posted a woman serving the Mayor Palm Beach, and other government officials, with papers stating that the statutes associated with the lock down violate the State Constitution and US Constitution and are committing treason. She gave them 10 days to correct the problem. What is interesting is that this County is where Mar-a-Lago is. Hum, a patriot in Trump land taking action. This action could be a massive domino effect. It is the legal argument template.

There are mass protests around the world. 4m in the streets of Berlin demanding Merkel to step down. Expect change in France as well as Macron gets more dictatorial. Bulgarian President asking parliament to resign and new Constitution to be written. The most Divinely inspired Constitution is the US. I think we will see its adoption around the World as each country, and its citizens, are given sovereignty and unalienable right to liberty and prosperity. Today Trump and Grenell announced agreement between Kosovo and Serbia with diplomatic relationships with Israel. World Peace is the foundation for GESARA on a global basis.

CEOs and other executives are resigning worldwide. We will see a dismantling of the mega transnational corporations, which will include big pharma, Silicon Valley, financial institutions, and more. COVID has been downgraded to common cold. Under 10K people have died of COVID as the only cause in the US. 94% died of co-morbidity or other factors. These new numbers are posted on CDC website. It's been discovered that the COVID virus was patented by the CDC. You can't patent something occurring naturally which is illegal. If it is manmade that violates international law in creating a bio weapon. Either way they have a problem. This part of the octopus of government agencies that are unconstitutional in their authority will be taken down too as they are proven to be liars and that they financially enrich key players.

The 13 bloodline families, Rothschild, Rockefeller Central Banks are being taken down which is necessary to reset financial systems and ushering in NESARA/GESARA. Part of the reset is to seize the assets of this criminal satanic empire.

Evidence something will be happening with Biden. He handed over 3 pizza boxes like Bush, Kevin Spacey, and Tieggen, which seems to indicate a surrender to the Alliance; and, it brings pizzagate front and center as well which is code for pedophilia. Trump did say that pedos should get death penalty. Also, Comey tweeted their dog Mia died. MIA could stand for Missing In Action. The tweet of a family dog that had died in the past has been a clue for a death of key player. RBG? Biden?

Kamala was chosen as VP because she is not eligible to run for either VP or President. If she is in the wings to replace JB, it is to call into question the eligibility of O bummer. The Anons on twitter are already putting for the eligibility narrative. Trump and Arpaio have all the evidence. This will nullify his entire presidency including his 2 supreme court picks. Mark Taylor did prophesy that Trump would get at least 5 supreme court judges. One would die. One would retire. And, 3 would be removed due to scandals. As the Republic is formally restored we need to take control of SCOTUS as well and restore to Constitutional Law. We will go to the law of the land under Constitutional and Common Law.

Charlie Ward is under an NDA and said he is part of moving Historical Assets to back the worlds currencies. Trump was on Battleship North Carolina and mentions heritage several times which could be reference to heritage assets in play. This battleship was key in the Pacific in WWII. Japan pillaged Historic Assets from the Chinese Dragon Families. When WWII set in, they couldn't get the assets back to Japan and buried them in the Phillipines, Indonesia and other locations. These assets include gold, precious gems, and other assets that are all off books. It is these assets that will be in play to asset back currencies. Trump's hair color was gold. Trump at is PA rally yesterday kept talking about paper straws and how they fall apart; and, maybe you needed a plastic one in your pocket. Law and Order. Apparently this 13 bloodlines that control the world Babylonian enslavement system operate from Venice and that is where are birth certificates are held which created the STRAWMAN on paper, which they used in order to create wealth in our name. He may be given us the clue to our liberation and perhaps access to our TDA account assets will be through plastic ... a card. Also, when he references Law and Order someone big was arrested. He made many Qs in the air. Slammed the podium with his right hand many times... ala Q that could be the BOOMs.

Michael Tellinger stated SA is nationalizing Central Bank under gov which is currently a corporation. Vision is for all governments to become GESARA governments. Rothschild and other banking families' central banks are being nationalized and ala Tellinger what may be happening is the debt is being put on these bankers in order to bankrupt them entirely.

In a 5D reality we can see things from alpha omega perspectives which is able to see and innerstand the beginning and end of cycles within cycles simultaneously. What I see is a second renaissance of massive creative expression around the globe with the emergence of creating and experiencing priceless that will stand the test of time well into the future. 5D is about operating predominantly from the right brain which is tied to the heart. This is the side of the brain that is connected to the mind of the Creator. What we will start to experience as a norm is an inner deep knowingness of things that are to come and the truth we haven't been told.

We are in an ascension process starts with establishing what is the truth. We need to firmly establish truth as a keystone - "Truth to Power". We need to imagine in a new

possibility where the norm is service to others versus service to self. 5D we can see the alpha and omega of new positive, prosperous possibilities.

Based on Gene and Tore's decoding of COVFEFE. It is key magnetic technology that is being fitted on 5G towers to make them also Tesla Towers to supply free energy. The ventilator narrative is about that perhaps too. 5G is going to 6G which is also very healing and oxygenating things. And, therapeutics many the key to decalcifying the pineal gland which makes it possible for everyone to be able to get expanded insights in order to unleash unbridled creativity. In addition, there are the medbeds, that will become readily available to us, which restores the perfection reflected in your soul signature and frequency and vibration of perfect DNA. It reverses the aging process and allows us to participate in creating Heaven on Earth for a very long time.

In a new financial reality Sacha Stone brought up that the new system must eliminate usury. Plato stated "money is dead, don't let it grow by itself". As such, interest on funds in banks doesn't make sense. How is this interest being created? As we see the currency revaluation and redemption of bonds, these funds will be in the QFS as pure potential tied to unlimited. Some gurus are stating everyone will get the same rate and that there will be no negotiation. Perhaps this is code for everyone being tied to unlimited potential.

In a 5D reality we need to anchor in what is possible and what we need to address. The DS, using 3D constructs, is desperate to collapse timelines in order to stay in power and usher in the NOW. We are the ones that can collapse the quantum field by discussing what we are envisioning.

The lockdown has been the cover to: rescue children and others that have been trafficked; arrest key cabal players; shut down the cabal octopus; to name of few endeavors. On the positive side. The shutdown has allowed us to: experience what it is like to not work and pursue what we are passionate about; expand our cooking creativity; witness the corruption; see alternatives to schooling; rebuild the nuclear family; meditate about what the future will look like, etc.

Let's open up this call to a discussion of ideas and new ways of doing things, built on the foundation of moral and spiritual law, in all facets of life from new forms of education and entertainment; new community structures; service to other at the community level; new form of agriculture; new art forms and instruments; synthetic intelligence; new manufacturing; new forms of transportation; implications of free energy and water; waste disposal; new types of apps that protect privacy... to name a few topics to explore.
