

November 13, 2020

Bernadette Gabriella Call

It is Friday the 13th and to a lot of people it looks pretty scary. However, we are not living "The Minority Report". We actually need to allow these people to commit felonies, treason, and sedition very publicly in order to try them in the appropriate court system for their crimes. According to Gene the Decoder we have several locations for military tribunals, including, underground in Greenland.

It seems that everything is still up in the air and that Biden will be the President. However, we are seeing the massive fraud that took place. Trump keeps referencing "legal" ballots. Trump is tweeting about the Dominion voting machine fraud where Trump votes were flipped to Biden. Dominion was used by 30 states.

Now for what this sting operation entailed; paper ballots appear to have an isotope-based watermark that is made visible by a certain light spectrum. Q put out "rigged for red" which now makes sense. It appears that this election was going to be rigged and turned into a sting operation. Finding ballots in landfills, rivers, dumpsters could have been made possible by GPS enabled tracking. Gene the Decoder stated that there was a quantum dot embedded in the paper that is tied to the Quantum Voting System so only valid ballots are counted and also ballots that were dumped or destroyed were tracked. Apparently, Trump was observing the tally of both valid and invalid live in a SKIFF. The Deep State did not anticipate a landslide victory for Trump which meant that their cheat had to be very outrageous and massive so there was no way to hide it. The software was flipping votes by 3%. However, Trump was already winning by massive margins so the 3%, which would have gone undetected, had to be dramatically increased. So counting was halted in swing states and resumed at 4 am when magically ballots all for Biden appeared.

Flipping ballots was not enough. So they had to fake ballots which are suspicious in that only the President was voted for and nothing else. Also, Trump tweeted out on the 2nd of October the word WELL misspelled where the L was an I. An anon on Tweeter put out that ballots for Trump name had Republican misspelled where the L is in fact a capital I which makes this word now a nonexistent party affiliation and therefore, ignored as a vote. This could explain how downline Republicans got voted in and in the house republicans picked up seats yet Biden got the vote. Then we had military votes not counted, dead people voting, more people voting than registered voters, service dogs voting, women voting twice using married and then maiden name, postal workers dumping votes, election workers filling out votes, votes all with same signature, Arizona poll workers handing out sharpies which invalidates ballot, it was reported on twitter now a AZ server has gone missing, Maricopa county now suspect (which is biggest county), etc.

Here is what Trump put out today:

- EYEWITNESS saw a batch of ballots where 60% of them had the SAME signature
- EYEWITNESS saw a batch of ballots scanned 5 times
- EYEWITNESS saw 35 ballots counted that were NOT connected to a voter record
- EYEWITNESS saw poll workers marking ballots with NO mark for candidates
- VOTER said deceased son was recorded as voting TWICE
- EYEWITNESS said provisional ballots were placed in the tabulation box
- FAILED software that caused an error in Antrim County used in Wayne County
- Republican challengers not readmitted but Democrats admitted
- Republican challengers physically pushed from counting tables by officials
- Democrats gave out packet: "Tactics to Distract Republican Challengers"
- Republican challenges to suspect ballots ignored

Not a single state has officially called and certified the election. It is only the media. It is possible that when they audit and count only the legal votes that is will show Trump winning by a landslide and both Houses solid red. It appears even CA may have gone red. If you notice no state has certified the election and a winner. Trump did say that Senate is complicated. We may see some arrests and/or resignations happening. In which case the Governor picks the Senator until the term is up. Like McSally in AZ who got McCain's seat. AZ knows something is fishy. Last election McSally rapidly conceded to Sinema. Currently McSally is not conceding to Kelly.

Deep State puppets are starting to reveal themselves. Grassley wants Biden to start getting presidential briefings. McConnell is dubious in where his support lies. Mittens congratulates Biden. Sasse, Murkowski, and Susan Collins are in Biden camp. Erdogan and Netanyahu congratulated Biden, along with Boris Johnson, Trudeau, Merkel, Martin (Irish PM), Saudi King Salman bin Abdulaziz, Morrison PM of Australia, Moon Jae-In President of South Korea, Suga new PM of Japan. Macron said with Biden we can make the Planet Great Again.

Supreme Court ruled in landmark case United States versus Throckmorton that fraud invalidates everything that is based on the fraud. It is possible that the election could be deemed invalid due to massive fraud that more than likely occurred in every state not just the swing states. In any case because we have more than one state exhibiting massive fraud a case could be made that the entire election is null and void.

Also, Trump is constantly using the FRAUD word. Trump writes, misspells, and uses words very deliberately. Fraud is the silver bullet of malicious torts because it uniquely lets you “pierce the corporate veil”, which allows you to adjoin individuals to the case. Malicious torts have 2 key elements. They have actual damages and punitive damages. You can rest assured there will be a lot of law suits that come into play based on this Fraud and the scandemic fraud.

Here is what is happening in parallel which really show that that God is in control and God wins/won. The entire world is watching the outcome of the US election and how we the people handle it. FOX on the FIVE put out that maybe Trump will run again in 2024. This narrative will not play with the American People.

This will be resolved very soon. According to Gene by December 7th. No way will we dismiss this kind of massive fraud. No way will Trump allow patriots’ voices to be silenced. Trump put out yesterday, “Never bet against me”. He is always right because he is playing “the Art of War”. He never overtly enters a battle unless he has already won. There are organic rallies springing up all over the place. A big one is set for DC this Saturday where Trump may show up. We the people are showing Trump won by a landslide. Facebook just took off PRESIDENT for Trump and replaced it with Political Candidate. Zuckerberg is going to be burnt toast.

And, the stability of the world hangs in the balance. Based on what happens here, around the world election results may be challenged. We have retired military and special forces now “pulling on the leash”. We have patriots in the ready. Every hunter is a sniper. Women are also armed and know how to shoot and hit their mark. We have court battles in play some, according Harmeet Dhillon, have been filed before the election. Trump has put in over 300 federal court judges and now the Supreme Court is going to vote based on Constitutionality. The courts will more than likely decide this election. With the courts you have the ability to put in evidence for the world to see. What will be discovered is mass treason, sedition, and who was behind it all. This will take down the media and Silicon Valley Titans. Remember, Trump put in an Executive Order than anyone interfering with our elections will have assets frozen and seized. This could strip away the PMC (Power Money and Control) junkies financial wealth including politicians, media moguls, FTN 500 tycoons, Wall Street players, Hedge Fund titans, etc.

Good indication that cabal is losing, is that the virus is re-emerging as a contrived crisis. We are seeing Boris Johnson locked down UK, Merkel Germany, and Macron France. Some mayors are locking down Thanksgiving. This time around it is not working. People are taking to the streets.

The financial oligarchs are desperate too. Davos players are looking at using scandemic to try to do a global financial reset in support of a one world order with a one world digital currency. They need Biden in. However, his criminality is huge as more from the Hunter laptop will emerge.

In parallel the good guys are also planning a global financial and economic reset with NESARA and GESARA. Trump is very systematically implementing NESARA without announcing it. This will bring about a debt jubilee that is long overdue. In addition, we are going asset backed sound money. But, more importantly, we are going to a new economic and financial model that supports service to others as opposed to service to self. As such, there will be less emphasis on the bottom-line profit margins and more support will go to those companies and services that support the greater good. As such, the revenues will flow to these businesses as opposed to the current corporate oligarchs.

Trump keeps saying that the economy is going up and will massively go up next year. This can't be achieved by growth from the big FTN 500 international players. These companies are contracting. The only way that we will achieve mega growth and massive prosperity for everyone that is engaged is from a bottom up model of putting small business into play. In addition, it is the entrepreneur that is co-creating with the Creator which is where Divine Inspiration comes from. The small businesses used to be the primary employer. However, over the decades they have been displaced by big entities like Amazon, Walmart, Silicon Valley giants, big box chain stores, etc. These big players do anything to expand their power by eliminating their competition and stealing innovation. The patent system is nothing more than a facilitator of intellectual property theft. In addition, they have the deep pockets to litigate people into non-existence. This business model won't survive. As we work together and combine our ideas and inventions, it become increasingly more difficult to reverse engineer what we have. Many of us inventors have opted not to patent our inventions and have protected what we have through Trade Secret... Namely no disclosure... best non-disclosure is no disclosure.

We are affecting quantum reality by what we think, say, and do. From where we are with a financial reset happening that puts a lot of things in play, including the necessary funds to facilitate rapidly bringing new things to fruition. We can't wait for a decade or more to have a massive impact that flips this ship from greed and evil to collective prosperity and good/Godly. It needs the necessary financial tools at the moment to make that happen. So God, and the Heavenly Treasury, is in play; and, could only be put in play once the existing demonic financial players are taken out and/or neutralized. A lot had to be cleaned up. The trafficking, where the cash cow is humans for sex, adrenochrome, organs, and sacrifice to other dimensional entities. The food source, or energy, for these beings has dried up which is diminishing their power. The associated money machine for the Deep State cabal has dried up. And, the shut downs has closed a lot of the laundromats, which would include gyms, nail salons, theaters, film production (Hollywood), high end retailers, luxury car showrooms, etc.

Given that the whole financial engine of the cabal came to a screeching halt by the good guys and their world-wide military operation, it can't be easily reconstituted. It would take decades to rebuild. There is an added twist to the take down that deals with the

entire financial infrastructure. The Quantum Financial System is going into play for movement of funds around the world. SWIFT, which is ancient, is going away and may only exist to move assets until everything is under the control of QFS. The QFS system moves money between accounts in seconds. Swift allows money to be taken out of play for days and weeks before it is credited to an account. The bankers use these floating funds to make more money by interbank lending. This is removed when the QFS is in play. Again, this is a necessary tech to facilitate a financial reset. What we will also be seeing is money being put into circulation organically, through our initiatives and others, as opposed to arbitrarily by keystrokes from the Central Banks like the Federal Reserve.

We are now in the great transition of Dark to Light. Creativity is in high gear. All of us have key initiatives that we are passionate about the name has come for this key moment in our story. As such, now is the time to name our initiatives. Also, I am having logos created for all of my key initiatives which gives them a reality. A great place, with really talented artist, to get logos is <https://FIVERR.com> I work with an artist from Pakistan who is amazing. His name is Muhammad Zain ... here is his direct link ...
